– Xavier Meril, Enterprise Architect, Sopra Steria

About Nlyte

Nlyte Software helps teams manage their hybrid infrastructure throughout their organization – from desktops, networks, and servers to IoT devices – across facilities, data centers, colocation, edge, and the cloud. Using Nlyte's monitoring, management, inventory, workflow, and analytics capabilities, organizations can automate how they manage their hybrid infrastructure to reduce costs, improve uptime, and ensure compliance with organizational policies.

Nlyte Software is part of Carrier Global Corporation, the leading global provider of healthy, safe, sustainable, intelligent building and cold chain solutions. For more information, visit [Nlyte.com](https://www.nlyte.com) or follow Nlyte on LinkedIn.

This case study of Sopra Steria is based on a April 2016 survey of Nlyte customers by TechValidate, a 3rd-party research service.

Describes the state of their data center management before adopting Nlyte in the following ways:

- Manual and unscalable record-keeping (spreadsheets, Visio diagrams, etc.)

Three biggest data center challenges before using Nlyte were the following:

- Low visibility into data center operations and issues
- Inability to track and manage workflow processes
- No accurate asset inventory

Top criteria for choosing their vendor for data center solutions included the following:

- Ability to reduce cost
- Ability to improve capacity planning
- Ability to optimize use of power, cooling, space and assets

Found the following Nlyte capabilities to be the most valuable:

- Capacity planning
- Asset lifecycle management ("dock to decom")
- Reporting and analytics

Realized the following benefits after deploying Nlyte:

- Detailed location of all data center assets with total number of asset types known
- Accurate and detailed data center capacity planning with confidence in capacity data
- Consistent automation of data center tasks
- Improved global asset lifecycle management ("dock to decom")
